: their callsigns immediately (or at least very quickly). Suggestions:

The ARRL proposed something similar to this a number of months ago,
and it quickly went "thud" with the alluring prospect of electronic
filing, which would speed things up tremendously - to about 2 or 3
weeks.

My own pet idea for implementing this is to issue a temporary
operator's permit, and make people find sponsors to allow them to
use their station licenses - like AB10M/jnh, if Joe New Ham goes to
AB1 Old Man to sponsor him. The advantages are easy implementation -
simply declare CSCE's indicating new license to be operator permits -

plus anyone who wants to get on the air is going to get a thorough personal grilling from the sponsor about operating practice. (Of course, it's legal now for one operator to use another's station license.) Bingo! Instant operating authority.

: that the FCC has finally gone ahead with a plan to honor requests for
: specific callsigns ("vanity" callsigns, in yuppie-speak)?

Last I heard, after reviewing the comments they were going to try to implement a one-time \$150 fee for a vanity call, which makes more sense anyway. Doing this requires Congressional action, since the only thing authorized now is \$7/year. So we wait.

What is it about some _other_ Americans that leads them to believe that the rest of the world does not?

The fact is that many other countries _have_ a growing middle class -- even countries like Mexico or India, not to mentionTaiwan or Singapore.
